

MAYCO Telescoping control window frames are supplied fully lead-lined with an integral all purpose telescoping section to accommodate all types of wall construction. Frames are designed to fit walls ranging from 4 inches to 6-1/4 inches thick. The standard 2 inch face x 1/2 inch deep face return is aesthetically pleasing and is compatible in appearance with most

standard hollow metal hardware and fixtures. Constructed of 16 gauge steel, corners are fully welded and ground smooth. Frames are precision factory punched for reversible stops, which are predrilled and counter-sunk, which allows for adequate glazing with either one or two panes of 5/16" lead shielding glass of one pane of 9/16" lead shielding glass.
